

Growing Up in Scarborough

A summary of the Growing Up in North Yorkshire survey 2022

Introduction from Stuart Carlton

Corporate Director - Children & Young People's Service

“ Nearly a quarter of the way through this century, I am delighted that over 15,000 children have again participated in our biennial ‘Growing Up in North Yorkshire’ survey 2022. We now have over a decade’s worth of data on what really matters to the children and young people in our county and it is more important than ever that they know we are listening to them and acting on their opinions, experiences and needs. Our council’s ‘Being Young in North Yorkshire’ strategy and vision stating that “*All children and young people are safe, happy, healthy and able to achieve in North Yorkshire*” is as true today as when it was first envisaged in 2021. The survey therefore provides us with that all-important insight into the lives of children and young people and is used by an array of professionals to focus support where it is needed the most in order to reduce health inequalities and maximise the health and wellbeing of the next generation in our society.”

Collecting the figures

Teachers were briefed on how to collect the most reliable data and then pupils anonymously completed the questionnaire (online or paper). The sample sizes are shown in the table below.

Completed paper questionnaires were returned to SHEU in Exeter for processing. However, the majority of the schools conducted the survey online. Where figures are also given in a chart, they are shown in bold.

All schools who took part have received their own individual school report.

Comparisons

Comparisons have been made between the figures from this district and from North Yorkshire as a whole. The North Yorkshire findings are given in brackets following the district figures, and a table summarising the most important significant findings is shown on page 15.

Trends

This study follows similar studies in 2022, 2020, 2018, 2014, 2012, 2010, 2008 and 2006. Where changes can be seen in the figures from the district in 2022, these are noted on page 14.

This report should be read alongside the summary report for the whole North Yorkshire data set, which includes a number of important additional pieces of analysis. The **Equalities Monitoring** analysis is appended to this report.

This report is based on the responses of 14,934 pupils

Our priorities:

- ❑ Though some improvements have been seen in children and young people's **resilience and emotional wellbeing** this is not consistent between genders, the older age groups and social identity groups, therefore it needs to continue as a priority.
- ❑ Respond to the emerging data about young people not always seeking out either a **trusted adult or service** for support and information about things that may be worrying them
- ❑ Continue to respond to **online safety risks** including a focus on primary-aged pupils who have unsupervised access to technology / TVs in their room after they have gone to bed and who communicate online with people they don't know.
- ❑ Promote a **healthy bedtime routine** for children and young people, including information on the correct amount of sleep for their age and promoting technology-free bedrooms.
- ❑ Though some improvements have been seen in supporting and encouraging a healthy lifestyle and positive body image there needs to be a continued focus on **hand washing, oral health, healthy eating** (especially for secondary school pupils), the gender imbalance in relation to **physical activity**, and ensuring all pupils have access to **swimming**.
- ❑ Continue to respond to the number of children and young people using **vapes** and the emerging data around snus and cali pens
- ❑ Continue to support all schools to implement an effective and well planned **PSHE curriculum** but with a focus on the secondary curriculum
- ❑ Continue to support schools and partners to reduce **bullying and prejudice-based incidents** in schools and the wider community through developing effective inclusive practice including a focus on identified groups of young people who continue to have more negative outcomes against a wide range of indicators.
